

# LISS Web Site Visitors

The greatest number of visitors use the Web site during the late Spring and late Fall. This may be the influence of the academic year, with heaviest use during the time of year when class projects and term papers are due.

*www.longislandsoundstudy.net* went on line in the fall 2003. Traffic has steadily increased as more people interested in learning about the Sound and LISS use the Web to read LISS publications, learn about grant programs, and interact with staff by e-mail using the LISS feedback form.
