

Program goals are to promote the use of Long Island Sound educational resources and to promote the interdisciplinary use of the Long Island Sound watershed and its resources in K-12 classrooms.

All K-12 teachers are eligible!

LONG ISLAND SOUND MENTOR TEACHER PROGRAM

EST. 2002

(LISMT)

More than 40 LISMT and NGSS workshops in Connecticut, usually in a coastal location with access to the Long Island Sound, have utilized more than 30 LIS mentor teachers to reach hundreds of formal and informal K-12 educators, and through them, over 35,000 students in more than 100 Connecticut cities, towns and regional school districts

The program consistently recruits high quality, creative and respected teachers to assist their peers in incorporating LIS content into curricula within the scope of the newly adopted Next Generation Science Standards (NGSS)

Objective:

Each grade-level specific pair will work together to plan and execute a one-day professional development session for their peers. Workshops will take place in Connecticut. There is funding for each pair to provide an outdoor component as part of the session. Each teacher will receive a stipend (\$40.00/hour for 35 hours = \$1,400 stipend per teacher).
